

XM radio provides important service to the public by having 24 hr traffic and weather information. The commercial radio station only broadcast traffic on the am/pm drive times. And they are not complete or totally accurate. That's the same with the weather in fact I never hear weather in the afternoon never mind news. If the3 NAB would getthere members to have better radio and not They repeat the same songs they have stupid dialoge between DJ and never have good information. The Clear Channel only seem to promote concerts that they have control with. So I think the NAB and there member should fix there house before they try to fix other houses. Let them get there act together and provide good radio instaed of the garbarge they produce now.

Thanks
